From Bench to Bedside: Protecting and Licensing Intellectual Property
Tech Launch Arizona

April 8, 2016
12:00 - 1:00 PM
Skaggs 325

Rakhi Gibbons
Assistant Director, Biomedical & Life Sciences Licensing

How are university discoveries and inventions transformed into commercial products?

How do startup companies form around technologies developed in university research labs?

Find out at this dynamic seminar hosted by the College of Pharmacy and Tech Launch Arizona.

This helpful talk, geared toward graduate students, will introduce intellectual property and commercialization concepts specific to academic investigators.

Rakhi Gibbons from Tech Launch Arizona, the UA office that commercializes the inventions stemming from University research, will discuss the various forms of intellectual property, the types of inventions that are protectable, and the resources available to university inventors to support efforts in commercialization and startup formation.
