Urbix Resources: Commercializing Methods for Graphite Purification and More October 2, 2018, Noon, Meinel #821

Presenters:

- Adam Small, CEO of Urbix Resources
- Amy Phillips, Licensing Manager, College of Optical Sciences

Urbix Resources, co-founded by UA alumni Adam Small and Nicolas Cuevas, was named last year as one of five companies to receive a Department of Energy technology development voucher for preliminary work oriented towards the advancement of ultra-high purity isotropic graphite.

The research began in 2015 through a sponsored project whereby Urbix commissioned the UA to develop processes for graphite purification and graphene exfoliation.

Join us as we hear from Small about their experience commissioning the work, collaborating with the research team, and working with Tech Launch Arizona to commercialize the intellectual property.

Please register at the link below by **September 28** to ensure that we have lunch ordered for you.

THE UNIVERSITY OF ARIZONA
**TECH LAUNCH
ARIZONA**

Identifying important discoveries.
Protecting and licensing inventions.
Creating startup companies.
Maximizing impact from the results of research.

How does it all happen?

Through this series of talks hosted by **Tech Launch Arizona**, you'll hear directly from UA inventors – faculty, researchers and staff who made it happen – about the process of creating inventions and how TLA is helping them bring them to the world through commercial pathways.

Each talk in the series – formulated specifically for faculty, researchers, graduate students and staff – features new speakers, new stories, and new lessons learned.

Lunch is always provided for those who register in advance.

We look forward to seeing you there.

Questions? Contact us.
