Glycosurf's "Batch 21": Using UA-Invented Green Chemicals in the Skin Care Industry December 4, 2018, Noon, ENR2 #S215

During the course of research, a UA team created a novel technology for chemical synthesis of glycolipids – a technology that would be beneficial to a number of industries, including skin care.

The inventing team included Jeanne E. Pemberton, PhD, and Robin Polt, PhD, both with the Department of Chemistry and Biochemistry, Raina Maier, PhD, of CALS, Department of Soil, Water and Environmental Science, and researcher Cliff Coss, PhD.

Join us as we hear from Drs. Boxley and Maier about their experience identifying and defining their invention, working with Tech Launch Arizona to commercialize it via their startup, Glycosurf; and their newly-released skin care product, Batch 21.

Please register at the link below by November 30 to ensure that we have lunch ordered for you.

Chett Boxley, PhD, CEO
of Glycosurf

Raina Maier, PhD,
Department of Soil,
Water and Environmental
Science, Co-inventor

Laura Silva, TLA Sr.
Licensing Manager for
the College of Science

THE UNIVERSITY OF ARIZONA
**TECH LAUNCH
ARIZONA**

Identifying important discoveries.
Protecting and licensing inventions.
Creating startup companies.
Maximizing impact from the results
of research.

How does it all happen?

Through this series of talks hosted by **Tech Launch Arizona**, you'll hear directly from UA inventors – faculty, researchers and staff who made it happen – about the process of creating inventions and how TLA is helping them bring them to the world through commercial pathways.

Each talk in the series – formulated specifically for faculty, researchers, graduate students and staff – features new speakers, new stories, and new lessons learned.

Lunch is always provided for those who register in advance.

We look forward to seeing you there.

Questions? Contact us.
