

CAMI

Infectious Disease Symposium

presented by the University of Arizona Health Sciences

This free, one-day hybrid event features distinguished researchers at the forefront of the field addressing infectious diseases. The symposium will connect leaders from across the country with interested students, faculty and potential partners. Join us to learn more and participate in sessions, panelist discussions and open question-and-answer forums.

The Center for Advanced Molecular and Immunological Therapies (CAMI) will serve as a center of research, startup activity, and corporate engagement with a focus on four areas: cancer, infectious diseases, autoimmune diseases, and real-time immune system monitoring.
